# Dulux Construction Solutions

Dulux partners with architects, interior designers, builders and engineers to deliver first-class construction outcomes. Our respected range of premium products and unmatched technical expertise allows us to provide end-to-end support to the design and construction sector.

Dulux Construction Solutions helps you design and build with confidence. Created to provide specifiers with the

tools, information and guidance they need to realise their projects' potential, it lets you access all Dulux product solutions in one convenient place.

Dulux Construction Solutions is your one-stop-shop for sourcing technical advice, physical swatches and samples, and assistance with product specification or problem solving. Work with us to find the best solution for your project and achieve exceptional results.

## Transport

The transport sector requires functional, durable and long-lasting solutions to protect and enhance essential infrastructure.

Transportation is a vital function of our society. It enables people to access work, education, essential services and leisure facilities, and supports the movement of critical materials and goods.

Transport projects include freeways and motorways, tunnels, bridges, train stations and rail transport, ports, airports and tarmacs. The scope of these projects often includes adjacent areas such as waiting and boarding spaces, toilets, staff rooms and more.

Transport infrastructure supports economic expansion and better productivity while improving social opportunities. Transportation construction and redevelopment is usually driven by technological advances, population growth or environmental, economic or political factors.

## Our Solutions

Dulux has been providing products and solutions for specifiers and contractors in the construction industry across Australia and New Zealand for over 100 years.

Dulux products are designed to meet the highest quality standards. Our team's extensive knowledge and transport sector experience allow us to provide valued support with specification writing and problem-solving.

With transport continuing to be a key development area in the building industry, Dulux seeks to remain at the forefront of these projects by ensuring we're engaged, active and informed of the key trends and initiatives within the sector. Our team recommends and provides tailored decorative and protective solutions for all transportation environments.

---

### Metal corrosion protection

Internal and external structural and decorative steel requires high-performance solutions that protect against the environment, including intumescent coatings where fire ratings are needed.

---

### The role of colour

Colour plays an integral role in the transport sector, with travellers at the forefront of design considerations.

Colour schemes can be used to support wayfinding and delineate different areas within transport hubs. Various building regulations require critical surfaces to be highlighted in colours and shades with an appropriate contrast.

In addition to playing a practical role in transportation construction, it's also important that these spaces are aesthetically pleasing for the thousands of passengers who use them each day.

---

---

### Hard-wearing protection for external surfaces

With most transport infrastructure located outside, construction materials must be coated and protected by hard-wearing products and systems that offer weather resistance and longevity.

The Dulux Construction Solutions range includes tough solutions for exterior surfaces, including products with anti-corrosion and rust prevention properties.

---

### Durable products that withstand rigorous cleaning

Transport handles constant passenger traffic and requires continuous cleaning. The products specified for these spaces must be durable, washable and provide protection from the elements.

---

---

## Durability for high-traffic areas

Transport works and maintenance must have quick dry/cure times to ensure minimal disruption to operations. Our market-leading paints and coatings are formulated to provide safe, reliable and fast-drying solutions that meet safety guidelines and minimise operational downtime.

---

## Graffiti resistance

Minimising the detrimental impact of graffiti is an important requirement in public transport environments. Dulux offers a range of coatings designed to support graffiti removal with appropriate chemical cleaners, including single pack, 2 pack coatings and powder coating solutions.

---

# Example Areas and Products

## Walls, Ceiling, Trim

New Zealand's leading range of high performance interior and exterior paints and decorative finishes.

# Our Brands

Dulux brands have been trusted for generations.

## Dulux Interior and Exterior Paints

From Wash&Wear® to Professional SteriGuard®, our high-performance paints and coatings are tailored to meet the New Zealand market's unique needs. Dulux paints offer standout results across an extensive range of more than 1000 colours from the Dulux Colours of New Zealand range.

## Dulux Powder Coatings

Dulux offers a wide range of premium powder coatings in Australia and New Zealand. Its extensive range of standard and custom architectural coating solutions are backed by extensive testing that ensures exceptional product performance and durability.

## Dulux Protective Coatings

Dulux Protective Coatings offer high-performance protection for metal and concrete assets including buildings, infrastructure, facilities, plant and equipment. Our tailor-made coatings and maintenance systems ensure your assets are effectively protected, even in the most demanding conditions.

## Dulux Avista Concrete Coatings

Dulux Avista offers professional decorative concrete solutions for new and existing concrete areas. Suitable for indoor and outdoor applications, our decorative surface products add colour, texture and patterns to driveways and concrete spaces in commercial projects.

## Dulux Acratex Coatings and Cladding

Dulux Acratex provides high-build facade coating systems for residential and commercial projects. Designed with the New Zealand built environment in mind, Dulux Acratex render coatings and external cladding solutions add style, protection and durability to diverse construction and maintenance projects.

## Specialized Construction Products

As a New Zealand-based manufacturer, Specialized has a clear understanding of the demands of tomorrow's buildings and the diverse weather conditions our buildings face. The cladding and plastering products that have been designed and developed, including several BRANZ appraised systems, provide the very best in cavity-based building envelope solutions for New Zealand conditions.

## Fosroc Construction Solutions

Fosroc delivers world-class solutions for a broad range of above or below ground construction and maintenance projects including waterproofing, concrete repair, grouts, sealants, protective coatings and industrial flooring.

### Porter's Decorative Finishes

Porter's decorative finishes combine the latest technology with traditional methods and the finest raw materials to provide a superior finish. From modern paints to lime and cement-based products and reactive metallic finishes, our proprietary tinting system creates beautifully rich and unique colours.

### Dryden Wood Oil Solutions

Dryden provides a range of premium wood oil solutions for timber. There is also a comprehensive range of specialist cleaning and coating products for a variety of applications.

### Intergrain Timber Finishes

Intergrain's High Performance Timber Finishes include a range of premium stains, oils, clear finishes and flooring clears, which are easy to apply and deliver a professional finish that preserves, protects and enhances timbers natural beauty.

### Dominator Garage Door Systems

The Dominator brand has pioneered a new standard in commercial and residential garage door systems. This standard is proudly represented in the latest range of Dominator garage doors and automatic openers. From the revolutionary Dominator automatic openers, through to the vast and ever-increasing range of garage doors, Dominator can provide the styling, security and reliable performance that all residential and commercial property owners need.

### Garador Garage Door Systems

Garador provides a wide range of garage door styles, colours and finishes for customers to select from - all smart, stylish & secure. Since 1962, Garador has been in the business of residential and commercial garage doors. With the biggest nationwide Dealer network and a dedicated transport fleet, Garador covers New Zealand and back up products with expert, reliable service that continues to stand the test of time.

### Admil Sealants and Adhesives

Admil has a range of sealants and adhesives for the construction market including 100% silicone sealants, industrial grade sealants, polyurethanes and construction sealants.

### Selleys Adhesives, Sealants and Fillers

Selleys has a specialised product range of market leading products for the trade. With a breadth of clever solutions in sealants, adhesives, fillers, paint preparation and application, household cleaning, and automotive care products. Selleys always strives to prove its slogan true, "If it's Selleys, it works."
